

Threat Protection Envisioning Workshop

Learn how to put next-generation Microsoft Security tools to work for you.

Engagement highlights

-  Review your security goals and objectives
-  Identify real threats and discover vulnerabilities in your environment
-  Map identified threats and vulnerabilities to specific solution recommendations
-  Develop joint plans and next steps

Do you know how many phishing attacks your organization has received? How confident are you that your organizational identities are secure and not vulnerable to exploitation? Whether there are any known vulnerabilities in your client or server devices? In short, is your organization's cloud environment as secure as you think it is?

Improve your security posture with a Threat Protection Envisioning Workshop

Organizations today are managing a growing volume of data and alerts while dealing with tight budgets and vulnerable legacy systems. Get help achieving your broader security objectives—and identify current and real threats—by scheduling a Threat Protection Envisioning Workshop.

We can help you develop a strategic plan customized for your organization and based on the recommendations of Microsoft experts in security. You'll gain visibility into immediate threats across email, identity, and data, plus clarity and support on how to remediate vulnerabilities and upgrade your security posture for the long term.

Why you should attend

Given the volume and complexity of identities, data, applications, devices, and infrastructure, it's essential to learn how secure your organization is right now, and how to mitigate and protect against threats moving forward. By attending this engagement, you can:

Identify current, ongoing security threats and discover vulnerabilities in your environment

Document your security strategy for the benefit of key stakeholders

Better understand how to accelerate your security journey using the latest Microsoft Security tools

Walk away with actionable next steps based on your specific needs and objectives

What to expect

During this engagement, we'll partner with you to strengthen your organization's approach to cybersecurity. We'll help you better understand how to prioritize and mitigate potential attacks, with:

- + Analysis of cybersecurity threats that are found targeting your organization.
- + Actionable recommendations to help immediately mitigate the identified threats and discovered vulnerabilities.
- + Visibility into vulnerabilities to your Microsoft 365 cloud and on-premises environments to better understand, prioritize and address vulnerabilities and misconfigurations across your organization.
- + Long-term recommendations from Microsoft experts about your security strategy, with key initiatives and tactical next steps.
- + Modular approach, allowing you to select three (3) out of six (6) available modules aligned to your needs and requirements.
